leaves, fruits and fibres collection: white coco, crazy cut cracking

product code
05-001-USO-01-9005

category
prime

material The leaves, fruits and fibres in our surfaces are diverse in origin. We have selected them either because they are a cultivated crop with declining markets, like kapok and tobacco, or they are unused parts of a food crop, like banana bark or coco shells. We gather, sort and clean the raw materials. They are stripped, cut or pressed to provide a flat surface for inlay. Each piece is inlaid and laminated by hand. The pieces are often of uneven thickness and veins or dense fibres require careful lamination. The colour variation can be extensive within a piece, for example in banana bark or abaca; by season, as with tobacco leaves, or with plant age, as with gugo. This is part of the natural beauty and individuality of each piece

finishes The standard finish is unlaminated, smooth. Options: Laminated, smooth with matt or high gloss (90 sheen) finish.

substrate The standard substrate is 30 mm MDF. For alternatives please consult our technical specifications, www.naturesquared.com/technical_info.htm.

prices & delivery www.naturesquared.com/prices_delivery.htm.

customisation We can customise all our surfaces to meet your needs as to colour, texture, pattern, finish or size, www.naturesquared.com/customisation.htm.
